

# COIN-078B : Internet Programming with XML

## Assignment Guidelines & Requirements

**Note: Please follow the specifications below. Points will be knocked off if not followed.**

### Requirements:

- Every XML file uploaded for submission must contain the following after the XML declaration processing instruction:  

```
<!-- http://153.18.145.30/~username/filename -->
<!-- Lastname, Firstname -->
<!-- Course name & section Winter 2007 -->
```
- Every block-level & inline tag should have a corresponding begin & end tags
- All values should be double quoted
- Tags should be properly nested
- All XML files should be well-formed; XML documents with DTD or Schema should be valid
- Use relative paths (eg. src="images/mypic.gif") when linking to files within your site. This rule pertains to all href=, src= & anyURL attributes.
- All HTML files should end in **.htm** in this class
- Name your files **exactly** as specified
- Follow the specifications of each assignment
- Create an **index.htm** splash page that has links to all your assignments and final project.
- Upload all TXT, HTML & XML files and **images, java, schemas**, and **styles** folder inside the **public\_html** directory of your Foothill College CTIS Unix account. Your home directory should look like the following: (Please note that the example below does not represent all your files for this course.)

```
[home directory]
|
[public_html]
|
- index.htm
- assign1.xml
- assign1.htm
- assign1.txt
- assign2.fo
- assign2.pdf
- assign2.txt
- assign3.txt
- assign4.txt
- assign5.txt
- project.xml
- project.txt
|
- [ java ]
|   |
|   | - somecode.class
|
- [ images ]
|   |
|   | - somephoto.jpg
|   | - somegraphics.gif
|
- [ schemas ]
|   |
|   | - some.dtd
|   | - some.xsd
```
